### Learn | Aurelia

Unfortunately Aurelia does not ship with a way to do this, but using a simple value converter we can easily add in this functionality to our repeater loops. Create the value convertor and save it as "limit-to.js" or whatever file extension you use: `export class LimitToValueConverter { toView(array, count) { return array.slice(0, count); } } ...`

### Working With The Repeater In Aurelia - I Like Kill Nerds

Description Aurelia is a web framework that makes it much easier to create single page web applications. Aurelia was written with ES6, so modern JavaScript design principles are baked in from the ground level.
