In this article, we will learn all about the

# File Type PDF Chapter Review For Work Power And Machines

concept of work, power and energy.  
Work done is generally referred in  
relation to the force applied while  
energy is used in reference to other  
factors such as heat. Power is defined as  
work done per unit time. Work Formula  
Example of Work Types of Energy Power  
Formula Questions

# File Type PDF Chapter Review For Work Power And Machines

## **Work, Energy and Power Definition, Units, Formula ...**

Power = Work done/ time taken. Or  $P = W/t$ . where  $P =$  Power.  $W =$  work done.  $t =$  time taken. Also, when work is done, an equal amount of energy is consumed. Thus, power is also defined as the rate
