Basic Router Config- 1841 series - Cisco Community
You'll need a Cisco console cable to break out the RS232 lines in to a DB9, and of course a computer with a serial port. Once you have those, use PuTTY or a similar terminal program set at 9600 baud, 8 data bits, No parity and 1 stop bit. Hit the [ENTER] key a few times and you should be presented with the System Configuration Dialog screen.
