Music writing software, also called a scorewriter, is a program that lets you easily create sheet music. It's basically like Google Docs for the music you make — and then some. It turns the frequencies and soundwaves you've created with an instrument or your voice into marks on a page that can then be read and played by other musicians.

7 Best Music Writing Software Programs for DIY Musicians

Computer music is the application of computing technology in music composition, to help human composers create new music or to have computers independently create music, such as with algorithmic composition programs. It includes the theory and application of new and existing computer software technologies and basic aspects of music, such as sound synthesis, digital signal processing, sound design, sonic diffusion, acoustics, and psychoacoustics. The field of computer music can trace its roots ba
