S-Tools is roughly 589 kb in size, small enough to fit on a floppy. As is the case with many steganography programs, S-Tools leaves little in the way of a footprint. However, there is a known signature of S-Tools. S-Tools reduces the number of colors in the cover file to a minimum of 32. In doing so, grayscale images are affected.

Steganography is the hiding of messages in plain sight, it hides a message within another message that looks like a normal message. This is different from Cryptography in which the secret message is converted to what looks like a meaningless jumble of characters. Example: You mail a letter. It currently takes 37 cents in postage.
