According to Fischer (1999), this is because “we accept the view that poverty in the midst of plenty is not socially acceptable,” and because equitable adjustment programs are more likely to be sustainable. In the case of the Philippines, the importance of equity considerations is heightened by the persistence of significant poverty, in part a consequence of the weak and uneven growth performance discussed in Section II.

Philippines : Toward Sustainable and Rapid Growth

The Philippines recent experience suggests valuable lessons for emerging economies' efforts at crisis prevention and management, as well as for the country's own policy choices. This paper describes this experience, focusing on the elements behind the relatively strong performance as well as the remaining reform agenda.

Philippines : Toward Sustainable and Rapid Growth:

The main driving force behind the recent favorable export performance has been the electronics sector, which has experienced rapid growth since 1994, and has become by far the dominant export sector (Figure 5.7 and Box 5.1). To a large degree, the Philippines' continued export-led
